Learning Disability Services

 How does this affect you?

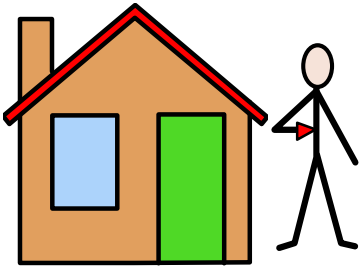

Our promise is:

For you to live in your own home in your own community where possible

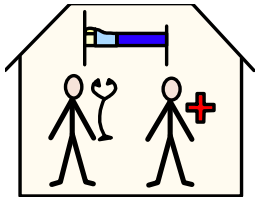

To help you to be independent

To help you be involved in your community if you want

The Strategy will try to make health care better by:

Letting you know what health services there are

Helping to check on your health

Giving you the right health care for your needs

Help you to stay healthy

The Strategy will try to make social care better by:

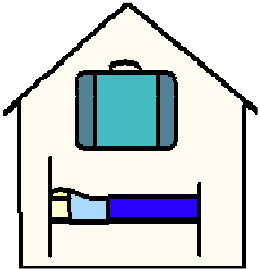

Helping you to live independently in your own home

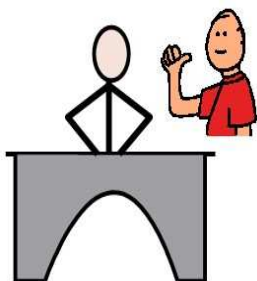

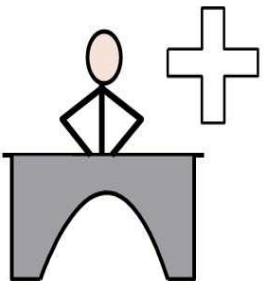

Giving the right care if you have complex needs

Have better community based services so people can stay close to their family

Have more respite to give you and your family or carer a break

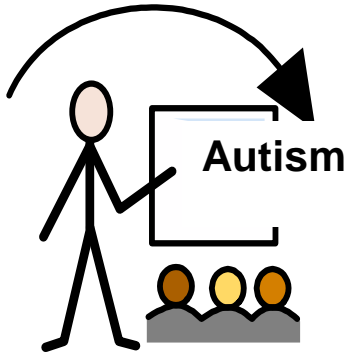

Improve how health and social care managers work together in your best interests

Work with you to plan and make decisions about your life

Challenge discrimination and make sure people see you in a positive way

Help people to learn about Autistic Spectrum Disorders
