Disclosure Control: Due to a requirement to observe the Registrar General's disclosure control protocols for experimental and official Mid Year Estimates of population it has been necessary to round population figures provided in this profile to the nearest 100 persons. Due to the danger of disclosure by difference the NHSAR population figures in this brief have also been rounded to the nearest 100 persons. For both datasets, when the population estimate was less than 50 persons, the value of 50 has been used. However, it is important to note that all graphics and the percentages presented in this profile have been produced using raw un-rounded estimates. The difference between NHSAR and MYE population estimates are also presented here in their un-rounded raw format.

Summary Key Statistics Page

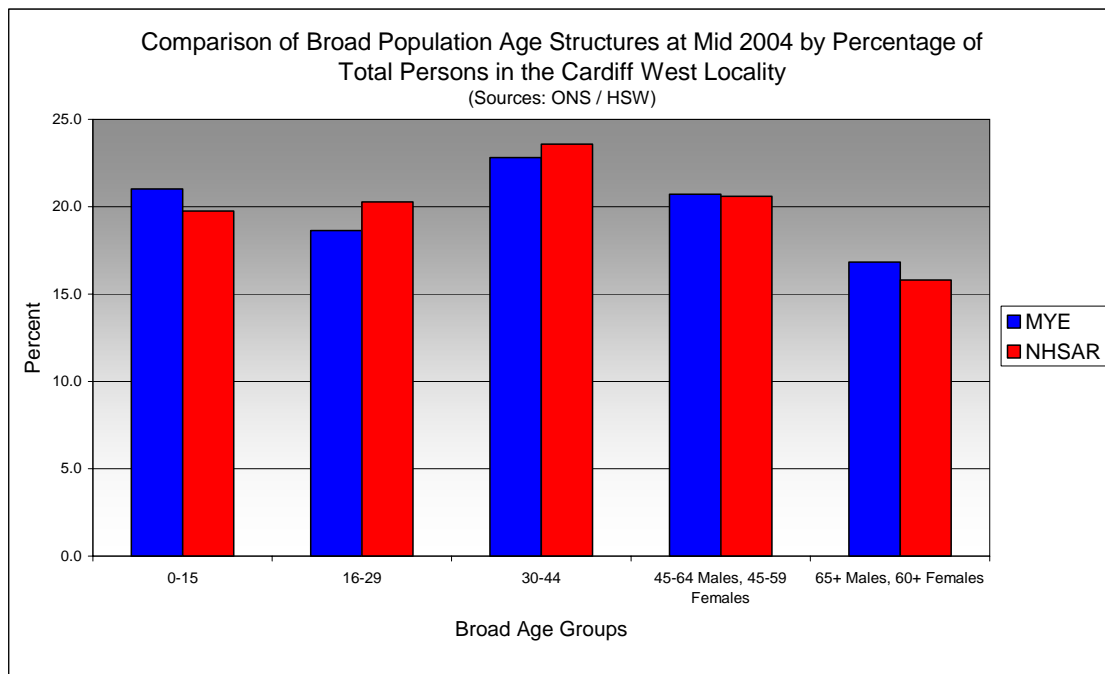

- In the Cardiff West Locality total NHSAR population at Mid 2004 was 11.6% (approximately 9,900 persons) higher than the experimental Mid Year Estimate.
- Total male NHSAR population was 16.1% higher, while total female population was 7.4% higher.
- NHSAR population counts showed the greatest variance from the Experimental MYEs in the following age groups: 20 to 24 years 30.5% higher and 25 to 29 years 23.2% higher. The NHSAR count is higher in all age groups within the locality, the variance is lower for the youngest and eldest age groups.
- The Cardiff West Locality is ranked 2nd (MYE) and 3rd (NHSAR) out of 4 Localities in Cardiff for it's total dependency ratio. This means it has the second highest dependency ratio of the four localities in Cardiff according to the MYE population age structure. The locality has higher ratios than the Cardiff averages but lower ratios than the Wales averages.
- The Cardiff West locality is ranked 1st (MYE & NHSAR) out of four localities for the total number of younger dependents aged 0 to 14 resident within the area.
- The locality is ranked 2nd (MYE & NHSAR) for the total number of older dependents aged 65 and over resident within the area.
- A majority of dependent age group population (0 to 14 + 65 and over) are young dependents aged 0 to 14, representing 57.6% (MYE) and 57.4% (NHSAR) of total dependents.
